

Get to GRIPS with your packaging returns

GRIPS™ – The integrated packaging management system that allows you link your packaging specifications to existing accounts or stock control systems, producing your compliance reporting requirements in minutes!

Benefits:

- **Reduced cost; greater accuracy**
Less time spent preparing returns with fewer errors
- **Simplicity**
Removes complexity of compliance reporting process
- **Strong Audit Trail**
Drill-down capability for improved management reporting
- **Management Information**
Identifies high-compliance cost items
- **Ease of use**
Windows-style interface reduces training

How GRIPS™ works

GRIPS is an integrated Packaging Management System that allows you to manage your full packaging specifications. It achieves this by linking packaging specifications to existing Accounts or Stock Control systems, extracting the relevant data and producing complete compliance reports.

This saves time, reduces errors and removes much of the complexity around compliance reporting. In addition, the system can maintain a full audit trail for all transactions, allowing the entire process to be easily managed.

GRIPS was designed to be simple and intuitive to use and clients are provided with a comprehensive training program. GRIPS can be quickly and easily configured to produce Compliance reports and other management information and a full audit trail is maintained at all times

About Greenstreets

Founded in March 2000 with the goal of providing specialist advisory services for companies legally obligated under the Waste Management (Packaging) Regulations. The company has expanded its portfolio in line with European waste legislation and now provides advice and training in other areas of environmental compliance, specifically End of Life Vehicles (ELV), Waste Electrical and Electronic Equipment (WEEE), Waste Tyres and Waste Batteries.
